

Optional Science Tasks:

Over the next few weeks, Science will be adding on some extra projects you can get involved in with your family. They are all about the nature you can see when on you go for a walk or that visit your garden. **This is optional so ONLY DO IT IF YOU WANT TO.**

- Let's start with the birds you see: Below is a list of the 19 most common birds in the UK, how many can you find? Can you see others not on the list? **Please upload any photos you are able to take.**
- You can also do a poster about them, what do they eat, where do they live (habitat) and as a **stretch and challenge** what is its Latin, scientific name (i.e. the Goldcrest's scientific name is *Regulus Regulus*).
- You can do the poster in word or powerpoint or draw it on paper and send in a photograph. If you can't get a photo of the bird yourself use one from google to illustrate your work. We are looking forward to seeing what you can find out.

(If you're not sure how to send us your project work, there is a link below to show you how to submit work through SMHW.)
